

Treatment of Patients with Complex Bifurcations Lesions, Including Distal LM Objectives of the Session

**Angioplasty Summit-TCTAP 2010
28-30 April**

**Marie-Claude MORICE, MD, FESC, FACC
Institut Jacques Cartier, Massy, France**

Objectives of the session:

- **To provide a 2010 « state of the art » of the Treatment of bifurcation lesions, including Distal left main**

- **By discussing the latest results obtained with DES in bifurcations (B. CHEVALIER)**
- **By sharing with you how other imaging modalities(IVUS, OCT) can help to improve the results (M. VALGIMIGLI)**
- **To discuss the particular issues associated with bifurcation lesions in the setting of primary PCI for AMI (P. KALA)**
- To adress the specific issues of the biggest bifurcation: the Distal Left Main (A BAUMBACH)**
